#6

Change filters

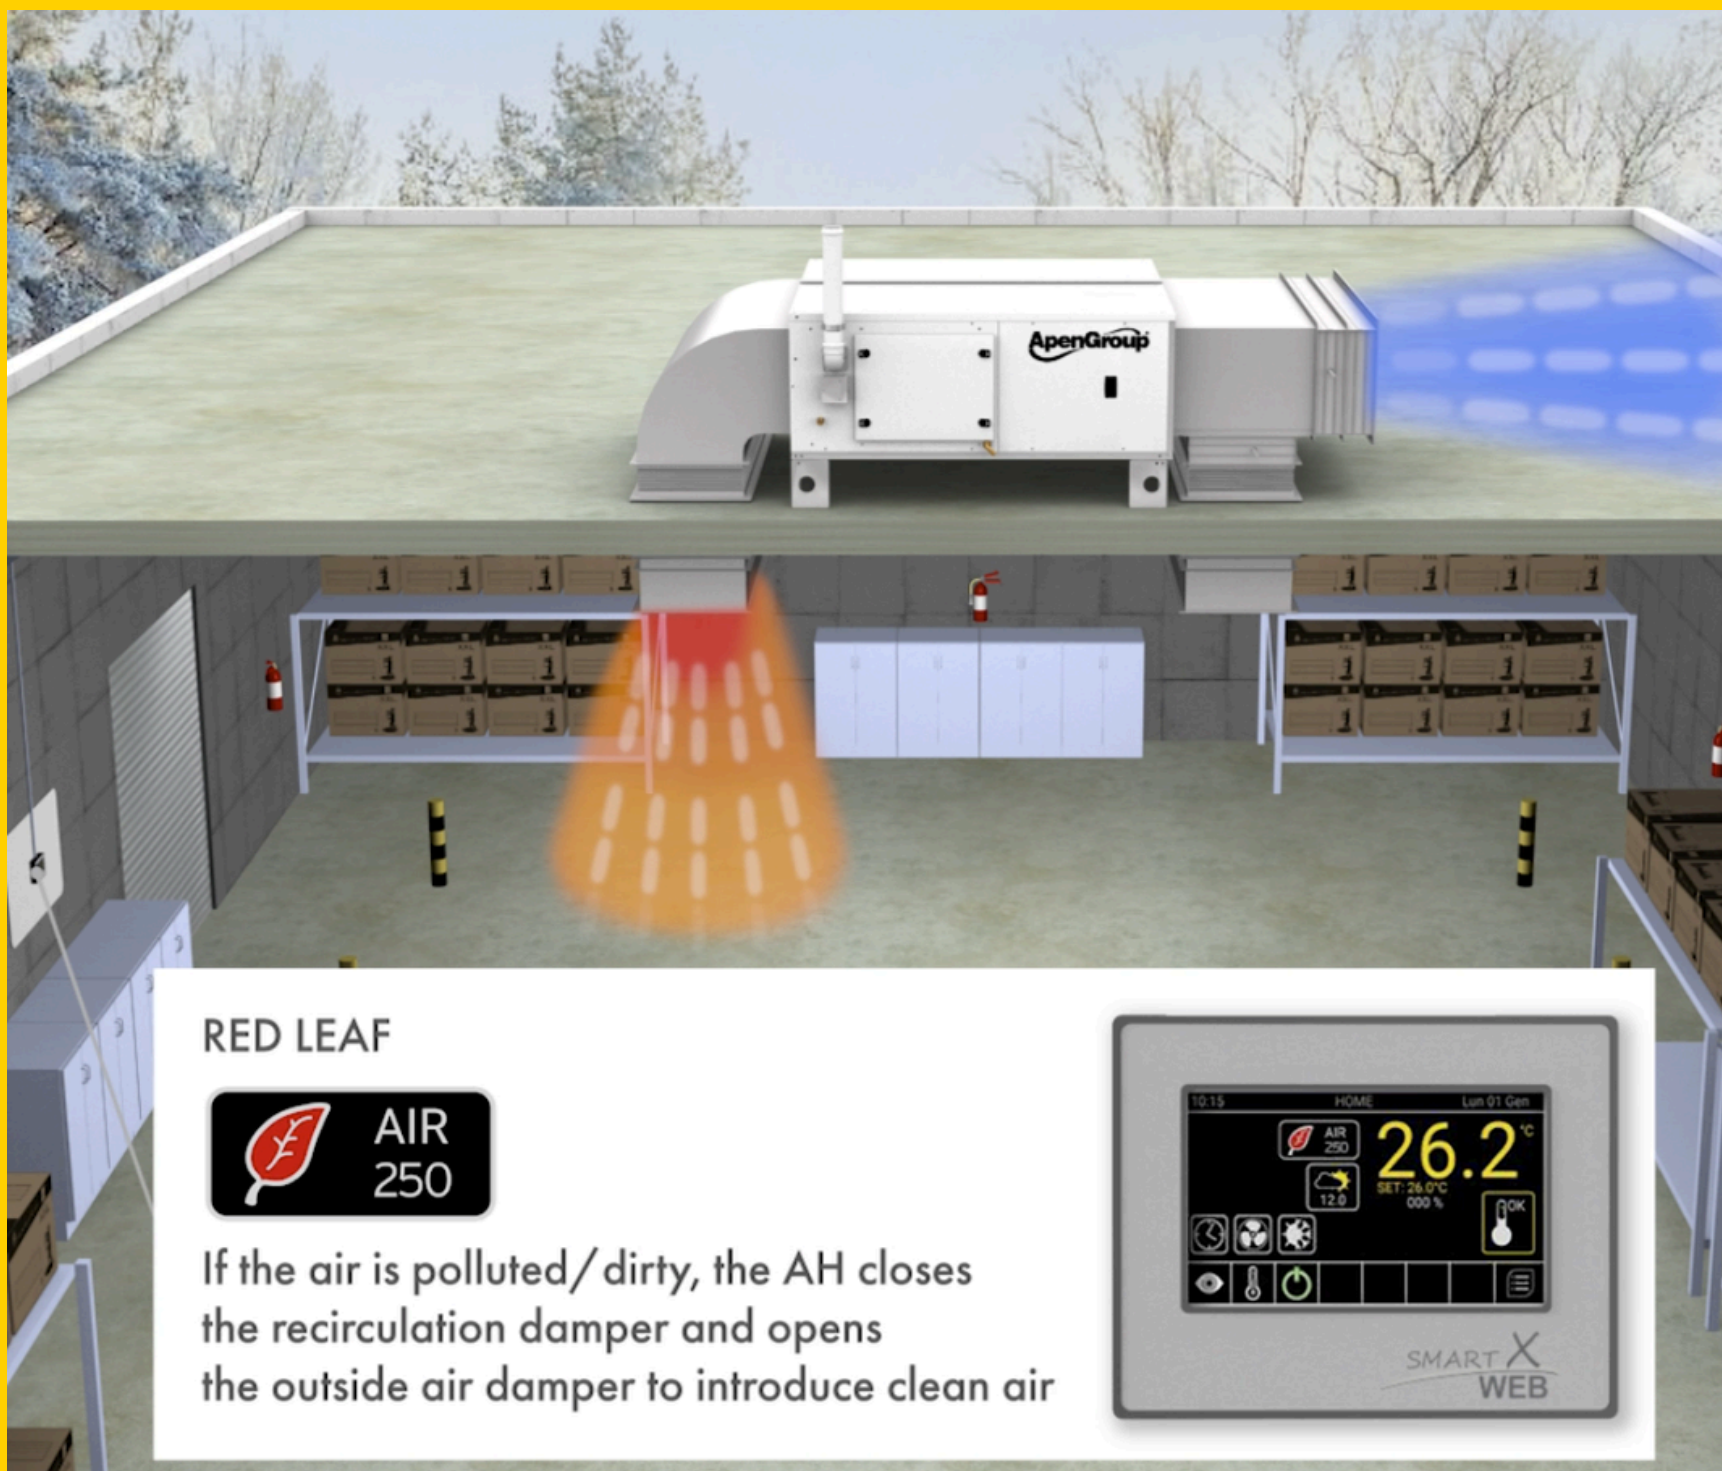

Filter to be replaced

ALERT E72

Report that the filter is very dirty/clogged and the machine is stopped. It requires manual reset

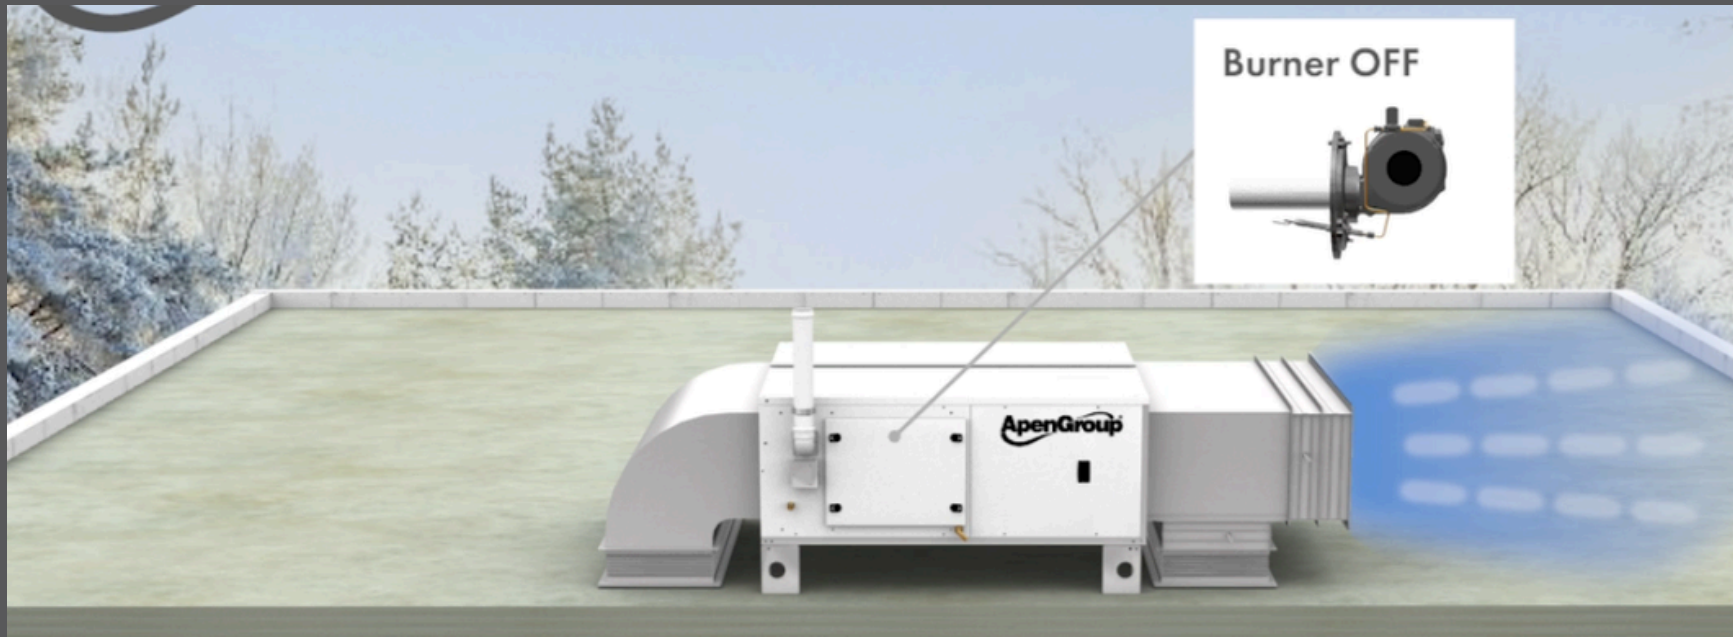

#7 **Air quality**

#8

Continuous ventilation

CONTINUOUS VENTILATION

With the room temperature set point **SATISFIED**, the burner is switched off, but the fans continue to run at reduced speed for a continuous air exchange (the function is active only within the set time slot).

Burner LOW

#9

Pool

#10

Silent

Function SILENT

Within the time slot, the fans are manually forced to operate at reduced speed to allow a decrease the system noise level in the environment.

#11

Free
cooling
